

Expresser 1 : One Week Course

1-week Special Course is a short term program developed with the most effective educational methodology; naturally harmonized with areas such as grammar, vocabulary & reading and so on, in spoken English to improve students' speaking skill faster. All subjects are constructed by focusing on speaking and the class starts from Monday afternoon to Saturday morning before leaving the country to maximize studying result in a short time. Especially, Pattern English class has different teaching methods unlike other usual techniques so far in the Philippines. Teachers will train students to speak fluently with repetitive practicing loudly in a class what they learned from the normal ESL classes with only a minimal speaking practice and limited time for self study at night. This will make students speak English although for one week studying period.

Normal method in the Philippines: Learning vocabulary, sentences etc., and simply practice in the class

CELLA 1 week pattern class : Learning vocabulary, sentences etc., and hard training until a student can speak fluently in the class
